Skills: AI Programming, UI Programming, Object-Oriented Programming, 3D/2D Game Development, Systems Design, Documentation, Team Management

Tools: C#, C++, Python, Unity, Unreal Engine

PROFESSIONAL EXPERIENCE

DREAMSTATIC GAMES (WIP) | Mechanisoul | Programmer / Producer

Aug 2025 – May 2026

3D Hack 'n' Slash Roguelike

- Implemented dynamic switching of VFX assets for five emotional melee upgrades
- Managed documentation (GDD, Product Backlog, etc.) of the project
- Hosted and managed weekly team meetings for discussing project deadlines and establish priorities
- Conducted daily scrum meetings for keeping track of team progress

STUDIO FRIENDSHIP | Nature's Solace | Gameplay Programmer

Mar 2025 – May 2025

3D Narrative-Driven Game

- Implemented character controls such as walking and interactions using Unity's New Input System
- Implemented setting controls which allow for changing volume and camera sensitivity
- Implemented a grayscale system using a shader graph that increases the saturation on the player camera when the player completes tasks
- Created a scene loading system between four levels using additive loading for retaining the status of the hub level
- Implemented an inventory system which keeps track of items picked up at different levels that are accessed in the hub level

INDEPENDENT TEAM | Galactic Grudge | Gameplay Programmer

Aug 2024 – Dec 2024

2D Space Shooter

- Implemented grid spawning of basic enemies
- Implemented enemy looping back and forth movement across the screen
- Programmed ranged enemy attack mechanic that increases fire rate as more enemies are killed
- Programmed enemy that has three separate sections and moves down towards the player at random intervals

INDEPENDENT TEAM | Vestiges of Eternity | Gameplay Programmer / Artist

Jan 2024 – May 2024

2D Roguelike Shooter

- Programmed item pickups that modified player stats such as health, damage, fire rate, etc.
- Implemented scripts and animation controllers that properly handled player input directions with 2D character sprites
- Implemented scripts and animation controllers that handled enemy directional movement and attack patterns
- Created character, weapon, and item pickup sprites using Aesprite

EDUCATION

UNIVERSITY OF CENTRAL FLORIDA | B.A. Digital Media - Game Design

Aug 2024 – May 2026

UNIVERSITY OF CENTRAL FLORIDA | General Computer Science Minor

Aug 2022 – May 2024
